

**INTERACTIVE WEBINAR
FOR NON-PROFITS**

Effective Cyber Resiliency for NFP Community Services & Healthcare Providers

WEDNESDAY 25TH SEPTEMBER - 2:00PM

Session 1: Right-Sizing Cyber Strategy for NFPs

Luke is an experienced enterprise architect and cyber risk advisory specialist with significant experience leading and developing strategic cyber resiliency and IT transformation initiatives for some of Australia's most trusted and relied-upon organisations, spanning Finance, Industrial, Healthcare and Community services nationwide. Luke is passionate about assisting Australia's community services sector in defining the right-sized, business-led strategies to help the sector solve modern cyber security and resiliency challenges.

Session 2: Building & Implementing a GRC at a Large Charity

Leana is a seasoned professional in information and cyber security, with extensive experience across diverse industries. She is currently Head of Information Security & GRC at **Mission Australia**, one of Australia's largest charity organisations delivering critical services to Australian communities, where she leads the organisation's information security strategy, governance, and cyber aspects. Leana's expertise spans security risk management, incident response, and regulatory compliance. Her leadership in integrating cyber security into business operations has been instrumental in driving resilient and secure digital transformations. Leana is also an advocate for advancing diversity in technology and regularly contributes to industry thought leadership.
